Main Street Safety Project

Upcoming Local Access Forums

This February, the Main Street Safety Project is hosting online Local Access Forums for Main Street business and property owners.

The Forums are an opportunity to:

- Hear the latest project updates
- Give feedback on the range of recommended safety tools, such as roundabouts, raised medians, pedestrian facilities & biking upgrades
- Discuss property access concerns and how the City will work with affected business and property owners throughout the design process

Visit mainstreetsafety.org before February 5, 2021 to register for the online session that works best for you, watch an orientation video, and review forum materials including the Recommendation Fact Sheet.

Register for a Local Access Forum

Sign up during one of the three times below (each will include the same information):

- Tuesday, Feb. 9 from 11:30 am – 1 pm
- Wednesday, Feb. 10 from 4:00 – 5:30 pm
- Thursday, Feb. 11 from 6:00 – 7:30 pm

If you are a Main Street Property or Business Owner please register to attend on of our Local Access Forums on Main Street Safety Project.

In addition to this email, a postcard will be mailed to all Main Street Property and Business Owners about the Local Access Forums with details on dates and locations.

Recommendation Fact Sheet

Individual community members are encouraged to review the Recommendation Fact Sheet as well. Learn more about the proposed solution "toolbox" and the range of recommended safety tools. If you have feedback, you can submit a comment through the project website or email the project manager.

Project Purpose

Springfield's Main Street is consistently ranked as one of the most unsafe city streets in Oregon based on the severity and frequency of traffic crashes. The Oregon Department of Transportation and the City must address this problem to save lives, reduce injuries, and lessen property damage due to crashes. The purpose of the Main Street Safety Project is to select infrastructure solutions that will make Main Street safer for people walking, biking, driving, and taking transit.

The selected safety improvements will provide for the movement of goods and people, support the economic viability of the corridor, accommodate current bus service and future transit solutions, and complement traffic safety education and enforcement.
