Main Street Safety Project

Upcoming Public Hearings

The Planning Commission Deliberations for the Draft Main Street Facility Plan are now scheduled for 7:00 pm on Tuesday, April 5, 2022. When the staff's published agenda packet is available, a zoom link will be available at springfielddoregonspeaks.org.

The Springfield City Council is tentatively scheduled to hold a Public Hearing on May 2, 2022 on the Draft Main Street Facility Plan as part of the ongoing planning phase for the Main Street Safety Project. If the City Council elects to do so, time has also been held on the Council agenda for May 16 and June 6 for possible continuation of the public hearing and/or deliberations.

Comments can still be submitted through info@ourmainstreetspringfield.org and will now be provided to the City Council as part of their public hearing process.

If there are any other changes to the project schedule, we will send out another e-update. To view the Draft Facility Plan and Project Fact Sheets please visit the project website.

Upcoming Oregon Department of Transportation Work

You might see Oregon Department of Transportation (ODOT) staff out and about next week. ODOT staff will be visiting neighborhoods along Main Street to gather information for a potential ADA curb ramp project. If selected, the project would be part of their 2024-2027 transportation budget and plan.

Safety for all road users is important to ODOT and they are prioritizing installing ADA curb ramps across the state. Springfield is one of many communities where they are hoping to make these pedestrian improvements that will benefit all users including those using a stroller or a wheelchair.

ODOT has been working closely with the City of Springfield and any project they propose will compliment or enhance the Main Street Facility Plan the community has been working hard to develop the past several years.

Sign up for ODOT's Springfield area email list to get future updates and information.

Project Purpose

Springfield's Main Street is consistently ranked as one of the most unsafe city streets in Oregon based on the severity and frequency of traffic crashes. The Oregon Department of Transportation and the City must address this problem to save lives, reduce injuries, and lessen property damage due to crashes. The purpose of the Main Street Safety Project is to select infrastructure solutions that will make Main Street safer for people walking, biking, driving, and taking transit.

The selected safety improvements will provide for the movement of goods and people, support the economic viability of the corridor, accommodate current bus service and future transit solutions, and complement traffic safety education and enforcement.
